# TYPY PROJEKTŮ

## Research and innovation actions (RIA)

- Výzkumné aktivity, základní a aplikovaný výzkum, testování
- ☐ Jedná se o granty, kde je úroveň financování nastavena pro všechny uchazeče na 100% uznatelných nákladů.

## Innovation actions (IA)

- Činnosti zaměřené na tržní uplatnění výsledků výzkumu, prototypy, testování, předvádění a pilotní aktivity
- ☐ Úroveň financování je nastavena na 70% uznatelných nákladů, s výjimkou neziskových organizací, kde je ponechána na 100%.

## Coordination and support actions (CSA)

- Akce určené pro informování a síťování
- Sdílení nejlepší praxe, příprava výzkumných agend které nezahrnují aktivity zaměřené na výzkum a inovaci
- ☐ Úroveň financování je 100% uznatelných nákladů.

Příklad z pracovního programu 2023-2024

- Developing a common approach for the European clinical research to enable pragmatic solutions to shared challenges across European clinical trials and/or cohorts for pandemic preparedness and response, guaranteeing the best interest of European trial or study patients or volunteers;
- Promoting an optimal use of resources, based on a sound scientific approach and maximising the value added for the generation of scientific evidence, through a common baseline approach towards protocol development, harmonised and FAIR data<sup>134</sup> collection and analysis leveraging existing initiatives;
- Involving relevant European stakeholders, such as representatives from regulatory authorities, industry, policymakers, patient organisations, etc., as well as relevant non-European networks and stakeholders;
- Promoting the visibility and attractiveness of European adaptive platform trials and/or cohorts for clinical investigators in Europe and beyond; as well as active communication with the science community, patient advocacy groups and other stakeholders, to develop trust, and also promote innovative approaches;
- Partners within the coordination mechanism should develop a plan to ensure its sustainability. Coordination with the European Pandemic Preparedness Partnership and the European Health Preparedness and Emergency Response Authority (HERA) is expected.

**HORIZON-HLTH-2023-DISEASE-03-06: Towards structuring brain health research in Europe**

<b>Specific conditions</b>	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 1.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 1.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	The conditions are described in General Annex B. The following exceptions apply:  In recognition of the opening of the US National Institutes of Health's programmes to European researchers, legal entities established in the United States of America may exceptionally participate as a beneficiary or affiliated entity, and are eligible to receive Union funding.

<sup>134</sup> See definition of FAIR data in the introduction to this work programme part.

	Coordinators of projects must be legal entities established in an EU Member State or Associated Country.
<i>Award criteria</i>	The criteria are described in General Annex D. The following exceptions apply:  The thresholds for each criterion will be 4 (Excellence), 4 (Impact) and 3 (Implementation). The cumulative threshold will be 12.

**Expected Outcome:** This topic aims at supporting activities that are enabling or contributing to one or several expected impacts of destination 3 "Tackling diseases and reducing disease burden". To that end, proposals under this topic should aim for delivering results that are directed, tailored towards and contributing to most of the following expected outcomes:

- Policymakers, funders and other relevant stakeholders<sup>135</sup> identify and agree on the governance structure and implementation modalities, allowing for an efficient establishment of a potential future partnership.
- Policymakers, funders and other relevant stakeholders build on the knowledge gathered in past studies performed at EU and national level.
- Policymakers, funders and other relevant stakeholders identify and agree on common research priorities and research needs, also taking into consideration developments at the international level where relevant.
- Policymakers, funders and other relevant stakeholders develop and align national and regional research strategy plans with long-term sustainability in mind.
- Policymakers and funders commit to providing financial support that will allow for a comprehensive, impact-driven structuring of the field of European brain health research.

**Scope:** Member States and Associated Countries have agreed to step up their coordination in the area of brain research, which could take the form of a European partnership on Brain Health<sup>136</sup> in the second Strategic Plan of Horizon Europe<sup>137</sup>.

Proposals should address all of the following aspects:

- Develop a structured system of exchange of information between policymakers, funders, and other relevant bodies<sup>138</sup> in order to establish synergies and avoid duplication of

<sup>135</sup> Other relevant stakeholders include researchers, health care providers and practitioners, patients, citizens, regulators and industry.

<sup>136</sup> In the context of the partnership, 'brain health' should be interpreted as a concept that encompasses neural development, neuroplasticity, brain functioning, and recovery across the life course, including mental health and wellbeing elements.

<sup>137</sup> This topic does not pre-judge the content of the second Strategic Plan of Horizon Europe.

<sup>138</sup> Relevant bodies include EU-supported initiatives, scientific and clinical societies, patient organisations, regulators and the industry.

# Self-management interventions and mutual assistance community services, helping patients with dementia and caregivers connect with others for evaluation, support and inspiration to improve the care experience

Fact Sheet

Reporting

Results

## Objective

According to the World Health Organisation (WHO, ADI), 44 million people around the world have some form of dementia, for which there is no effective intervention, to halt or reverse the progressive cognitive impairment. As Europe's population is ageing, long-term care for elderly citizens will become an increasing cost for society. To manage this transition healthcare policies in the EU and individual Member States are heavily focussed on extending the independent life of the elderly, with the dual aim of increasing their quality of life and reducing the costs of care.

In this project, we will build a mHealth application that is specifically targeted to caregivers and patients with mild to moderate dementia. The result is CAREGIVERSPRO-MMD: a tool integrating a broader diagnostic approach, incorporating the live-in family caregiver-patient dyad and considering this dyad as the unit of care.

CAREGIVERSPRO-MMD will provide value-added services based on social networks, tailored interventions, clinical strategies and gamification for improving quality of life for dementia's patients and caregivers that allow them to live in the community for as long as possible.
