Unveiling Criminal Networks through Innovative Drug Analysis Methods

Mr. Martin Kutra
Police Presidium of the Czech Republic

Police Presidium of the Czech Republic

Unveiling Criminal Networks through Innovative Drug Analysis Methods

Type of company/organisation: Police Presidium of the Czech Republic

Contact Details

Email: martin.kutra@pcr.cz

Telephone/Mobile: +420 603 477 877

Country: CZE

Drug profiling, drug identification, chemical profiling, trafficking, cross-matching

Funded by the
European Union

Police Presidium of the Czech Republic

Unveiling Criminal Networks through Innovative Drug Analysis Methods

Role in the Proposal: Coordinator

Existing consortium:

- *Proposed WP leader: Police Presidium of the Czech Republic*
- *Partners: LEA – method testing and data collection (Germany, Italy, Portugal, Spain, Albania, Croatia); Academics and Industry (SW and AI); SME; other partners EUROPOL/INTERPOL (advisory on drug routes)*
- *Looking for partners with the following expertise/ technology/ application field: LEAs worldwide, forensic laboratory*

Police Presidium of the Czech Republic
Unveiling Criminal Networks through Innovative Drug Analysis Methods

List the Destination/s and topic/s that are of your interest:

HORIZON-CL3-2023-FCT-01-02

A harmonized European forensics approach on drugs analysis

What is the problem you seek to address? Comparison of the chemical composition of drugs and cross-matching of seized drugs

Outline your Project Idea: Combat drugs by developing a portable device for field use

Funded by the
European Union

Police Presidium of the Czech Republic
Unveiling Criminal Networks through Innovative Drug Analysis Methods

Explain the long-term impact of the solution/idea. Criminal network to be identified and dismantled

What is the research/technology/expertise/skills you own to solve the problem. Portable device development, innovative and patented methods & techniques

Drug profiling, drug identification, chemical profiling, trafficking, cross-matching

Police Presidium of the Czech Republic

Unveiling Criminal Networks through Innovative Drug Analysis Methods

Explain the Expertise of your company/organisation and outline any experience in EU R&I projects or other.

*The Czech Republic Police has extensive experience in **project management** and cooperation with EUROPOL/INTERPOL. Among our greatest successes is the creation of the **global collection of drugs seizures** called RELIEF Database.*

Drug profiling, drug identification, chemical profiling, trafficking, cross-matching

PROPOSED SOLUTION

CONCLUSION

Comparison of chemical composition of drugs is one of the biggest challenges for LEAs worldwide

Available methods for LEAs are insufficient and impractical due to their inaccuracy, complexity, length, and high financial costs, making their efficient use extremely difficult

The application of innovative methods and techniques in LEAs has shown significant potential in combating organized crime globally

inexpensive

Application of affordable methods, techniques and devices with utmost LEAs use potential worldwide

real-time result

Development of portable and affordable drug analysis kits that can provide on-site results

straightforward

Utilization of AI to simplify the analysis process and ensure accuracy and consistency of results

analytical & field use

Rapidly test the composition of drugs, providing crucial data for both analytical reports and on-the-spot decision-making

excellence guaranteed

Advanced patented techniques to guarantee the highest level of accuracy and efficiency in supporting LEAs activities

Funded by the
European Union

European Union

smiths detection

Making the world a safer place

Destination topic of interest

HORIZON-CL3-2023-FCT-01-02 A harmonized European forensics approach on drugs analysis

What it is the problem you seek to address?

Fast, non-invasive drug abuse determination and quantification

Project Idea:

- Non-invasive identification and quantification of multi-drugs of abuse, in one run
- Roadside drug testing in a car, mobile laboratories, police departments or laboratories.

Drughunter.eu

Funded by the
European Union

smiths detection

Making the world a safer place

Long-term impact of the solution/idea.

- Improvement on immunoassay false positives
- Immediate quantitative results, speeds progress to confirmation
- Reduction of false positives and suspect processing

What is the research/technology/expertise/skills you own to solve the problem.

- Detection product development, scale-up and manufacturing
- Chemical detection, trace and bulk expertise

Drughunter.eu

Funded by the
European Union

smiths detection

Making the world a safer place

40+ years in border management, customs screening and detection in CBRNe, trace detection, digital

Outline any experience in EU R&I projects or other.

Successful participation in 13 EU projects (FP7, H2020, HE) including two 2022 Cluster 3 calls.

Current partners

Smiths Detection – commercial partner
Drughunder.eu – technology provider

LOOKING FOR:

Project co-ordinator

Police and customs end-users

Forensic Science institutes, toxicology

Funded by the European Union

Making the world a safer place

Destination topic of interest

HORIZON-CL3-2023-BM-01-02 Identify, inspect, neutralise Unexploded Ordnance (UXO) at sea

What it is the problem you seek to address?

Stand-off underwater explosives detection (in shallow or deep waters)

Project Idea:

- Stand-off UXO detection capability in deep or shallow waters
- Potential for through-shield chemical differentiation of unexploded ordnance
- Potential for underwater communications feasible with same technology

Funded by the
European Union

smiths detection

Making the world a safer place

Long-term impact of the solution/idea.

- Increased capabilities to detect, classify, inspect, assess and neutralise UXO at sea
- Detect UXO on and below the marine sediment/seabed, in order to detect also buried objects
- Significant differentiation with acoustic and backscatter methods

What is the research/technology/expertise/skills you own to solve the problem.

- Detection product development, scale-up and manufacturing
- Chemical detection, trace and bulk expertise

Funded by the

Detecting, Locating and Tracking Cellular Devices for Enhanced Border Surveillance Capabilities

HORIZON-CL3-2023-BM-01-01

Mr. Daniel Manor
Ubiqam Ltd.

Type of company/organisation: Small Medium Enterprise / R&I Focus

Contact Details

Email: danny@ubiqam.com

Telephone/Mobile: +972 544 70 10 29

Country: Israel

*Wireless Detection, Direction Finding, Spectral Immunity, Signal Classification,
Interference Mitigation, Anti-Jamming, Intrusion Detection*

Funded by the
European Union

Role in the Proposal: *Technical Lead / WP Lead*

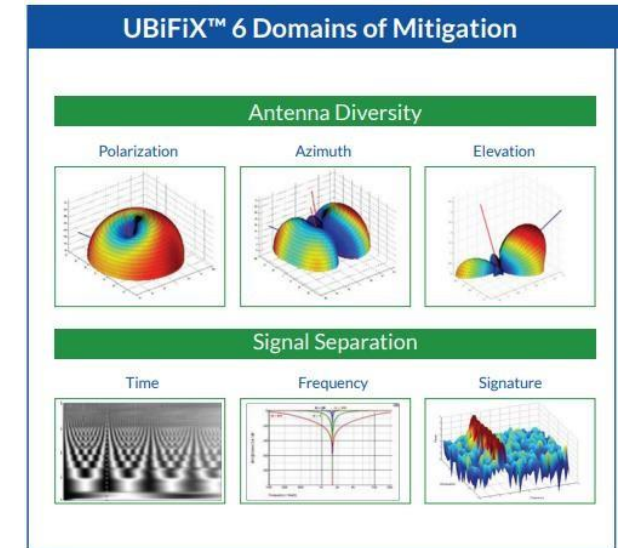

Capabilities:

Technology: *Wireless/cellular devices detection, classification and location finding, spectrum protection, anti-jamming*

Team: *Technology / R&I team with wireless algorithms, smart antenna, signal classification, SW and HW expertise*

Complementary Capabilities Sought:

- *System integrator*
- *Data analysis, fusion and extraction (machine learning / AI)*
- *Other sensors (e.g. radars, vision, thermal)*
- *Sensor deployment (UAV, UMV, UGV, Balloons, etc.)*

Funded by the
European Union

List the Destination/s and topic/s that are of your interest:

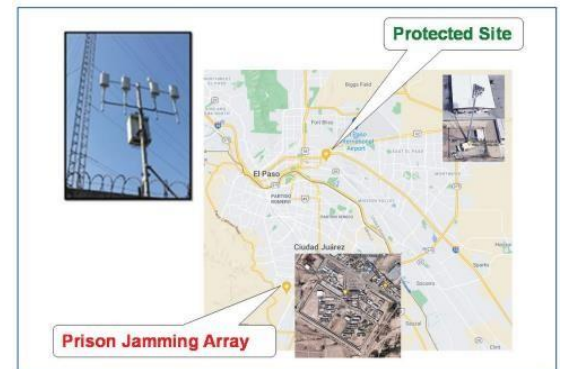

HORIZON-CL3-2023-BM-01-01

What it is the problem you seek to address?

Identifying border vicinity activity by non-intrusive tracking of cellular (4G/5G) devices presence and movements

Outline your Project Idea:

Enhance multi-sensor border surveillance by identifying, location finding and analyzing of mobile devices movement tracking

Solution's long-term impact

- *Cost efficient , high-performing border surveillance enhanced capability*
- *Tracking of cellular activity movement will support fight against illegal activities and enhance the security of people and operators in border areas*
- *Solution can be rapidly deployed and relocated for monitoring irregular border crossing*

What is the research/technology/expertise/skills you own to solve the problem

- *Cellular signals identification and classification*
- *Direction finding using antenna array*
- *Development and integration of wireless systems , HW and SW*

Expertise

- Antenna array processing for direction finding and spectral immunity
- Wireless technologies classification
- Solutions are commercially deployed in tier-1 networks

Previous R&I Projects

- REWIND FP7 Project – Technical lead, 2 WP lead
- 4 bi-national and 4 national R&I projects

R&I Team

- Over 150 accumulated years, experience in communication algorithms, DSP, system, RF, HW and SW design
- 10 awarded patents

Funded by the
European Union

*Enhanced Border Surveillance Capabilities
by
Detecting, Locating and Tracking Cellular Devices
using
previously untapped data gathered

ASELSAN SECURITY SYSTEMS PROGRAMME

Ms. Fulya TUNÇER ÇETİN
Chief Team Lead
Project Manager/ASELSAN

aselsan

*Type of company/organisation: defense company by Turkish Armed Forces Foundation
the largest defense electronics company of Turkey*

whose capability/product portfolio comprises

- Security
- radar and electronic warfare
- electro-optics,
- avionics, land, naval and weapon systems
- unmanned systems
- air defence and missile systems
- command and control systems
- Transportation
- Communication and information technologies
- traffic, automation and medical systems

Business Line: Security (ASELSAN- UGES)

Contact Details

aselsan

ASELSAN – a partner candidate

Expertise

- *Active projects in FIGHTING CRIME AND TERRORISM, BORDER MANAGEMENT and RESILIENT INFRASTRUCTURE*
- *Close collaboration with end users, which can join consortium*
- *Expertise in European Commission Project Management*
- *Biggest electronics integrator in Turkey*
- *Distributed and wide area deployment projects*
- *Allocates 7% of its annual income for self-financed research and development activities*

Funded by the
European Union

aseisan

Area of our interest:

FIGHTING CRIME AND TERRORISM

HORIZON-CL3-2023-FCT-01-03: New methods and technologies in service of community policing and transferable best practices

- Smart Traffic Checkpoint Projects with Face Recognition through Windshield*

BORDER MANAGEMENT

HORIZON-CL3-2023-BM-01-01, HORIZON-CL3-2023-BM-01-03, HORIZON-CL3-2023-BM-01-04

- Border management system over 1000 km Turkey border*

RESILIENT INFRASTRUCTURE

HORIZON-CL3-2023-INFRA-01-02: Supporting operators against cyber and non-cyber threats reinforce the resilience of critical infrastructures

- Security management systems project for Turkish Armed Forces Centers, Turkish Finance Center etc.*

aseisan

Cutting edge solutions on

- *End to end solutions comprising of sensor systems, response systems, management centers*
- *Integrated sensor management specialized to security solutions (radars, eo, lprs, biometric access control system etc.)*
- *Physical Security Management System providing situational awareness on 3D digital map with decision support feature*
- *Imaging sensors (4K smart cameras, integrated face recognition modules, plate recognition sensors)*
- *Image processing technologies*
- *Network Video/Image Recording Systems*
- *Video Analytic Solutions*
- *Fiber Optic Acoustic Sensor Systems*

aselsan

Expertise of ASELSAN in EU R&I projects

- *Active in H2020, FP7, EUREKA ITEA2 ve EUREKA ARTEMIS*
 - *EC FP7-SEC; 607821; SECTOR Secure European common information space for the interoperability of first responders and police authorities*
 - *EUREKA ITEA2: APPS- Advancing Plug & Play Smart Surveillance Project*
 - *EUREKA ARTEMIS: ALMARVI (Algorithms, Design Methods, and Many-Core Execution Platform for Low Massive Data-rate Video and Image Processing)*
 - *EUREKA ITEA2 - RECONSURVE (A Reconfigurable Surveillance System with Smart Sensors and Communication)*
 - *EUREKA ARTEMIS: COPCAMS (COgnitive & Perceptive CAMeraS) Project*
 - *EC FP7 SUBCOP (Suicide Bomber Counteraction and Prevention Project)*
 - *EC FP7 Hyperion (Hypersectoral Imaging IED and explosives reconnaissance system Project)*

Ms. IVANA DROBANOVA
id@sec-technologies.com

Info

- Partner in consortium - We are ready to help with bring on a partners
- CALLS WE ARE INTERESTED IN:
- HORIZON-CL3-2023-BM-01-01: Capabilities for border surveillance and situational awareness
- HORIZON-CL3-2023-DRS-01-05: Robotics: Autonomous or semi-autonomous UGV systems to supplement skills for use in hazardous environments
- HORIZON-CL3-2023-DRS-01-06: Increased technology solutions, institutional coordination and decision-support systems for first responders of last-kilometer emergency service delivery

- NATO Certified Company
- Member of 2 Captech groups – CBRN and Human Factors, [CapTech Electro Optical Sensors Technologies](#)
- We wrote long proposal in EIC
- Part of two Horizon projects last year

Expertise

- Only active detection system in a world
- CO2 pulsed lasers (no need for delta t)
- Detection up to 6 km, 99% humidity
- Defence sector
- R&D expertise to make our customers

Funded by the
European Union

Ideas for usage

- Integration on vehicle (UAV), helicopter
- Ideas for integration on boat or drone
- Firstresponders (after industrial catastrophes, during fires)
- Police (detection of drug labs)
- Maritime surveillance

Thank you for your attention

SEREN5

HERMES4ALL (Portable KIT for
advanced detection of threats and
illicit goods at customs check sites)

Marina Bresciani
BEIA (SME)

- BEIA (SME) founded in **1991**
 - Offices in: **Austria, Belgium, Romania** www.beia.eu
 - One of the leading providers of ICT solutions and services in Balkan/Danube region for cloud communications and IoT telemetry
 - Team of **90 people** with experience in over **100 R&D and Innovation** projects in various programme Eureka/Eurostars, ITEA, Celtic, Eurostars, ERA-Net, Horizon/Digital-Europe, LIFE+, CEF, EDF, ESA/ROSA, etc.

- *Capabilities for border surveillance and situational awareness -
HORIZON-CL3-2023-BM-01-01*
- *Beyond the state-of-the-art “biometrics on the move” for border checks -
HORIZON-CL3-2023-BM-01-03*
- *Interoperability of systems and equipment at tactical level; between equipment and databases; and/or between databases of threats and materials
HORIZON-CL3-2023-BM-01-04*

HERMES4ALL (Portable KIT for advanced detection of threats and illicit goods at customs check sites) aims to aid the implementation of the new EU Customs Union action plan to strengthen customs risk management and effective controls. Threat detection in postal flows; automated controls and detection that reduce the need to open or stop containers, packages, baggage, or cargo; decision support; portability of control solutions; and technologies to track cross-border illicit trade are among the capabilities.”

Impact points:

- **Enhanced protection of marine environments, facilities, and activities, as well as EU land, air, and sea borders, against accidents, natural disasters, and security threats such as illegal trafficking, piracy, and potential terrorist attacks, as well as cyber and hybrid threats;**
- **An enhanced border crossing experience for visitors and border officials staff, while upholding security and monitoring of movements across air, land, and sea external borders of the EU, supporting the Schengen area, reducing unauthorized movements of people and goods across those borders, and defending visitors' fundamental rights;**
- **Lessening disturbance to trade flows through improved prevention, detection, deterrent, and battle against unlawful activities involving movements of goods over EU external border crossing points and across the supply chain.**

Key Innovations:

- (1) **development of a time-sensitive IoT system for measuring specific biometrics detection parameters**
- (2) **early warning network utilizing wireless sensor network communication infrastructure**
- (3) **processing the data obtained and obtaining real time alerts using ML/FL algorithms**

Keywords: **hardware** (sensors, actuators, IoT), **service innovation** (AI, blockchain, cloud, big data, quantum security), **information technologies** (data analytics, back end, interfaces, front end), **integration** (software/hardware)

Seeking for partners such as:

- ❖ Border Authorities
- ❖ Airline Companies
- ❖ Police
- ❖ Customs
- ❖ Innovative SMEs
- ❖ Research Institutions

| Ubiqam Ltd | <i>Mr. Rami Hasarchi</i> |
| DLR | <i>Dr. Arto Niemi</i> |
| Bosonit: Nworld group | <i>Ms. Sabine Delaitre</i> |

Supporting operators against cyber and non cyber threats to reinforce the resilience of critical infrastructure using spectral wireless communication immunity and anti-jamming technology.

Horizon –CL3 -2023 –INFRA -01-02

*Mr. Rami Hasarchi
Ubiqam Ltd*

Type of company/organisation: Small Medium Enterprise / R&I Focus

Contact Details

Email: ramih@Ubiqam.com

Telephone/Mobile: +972525617501

Country: Israel

KEYWORDS

*Resilient critical wireless communication and infrastructure
intrusions detection, interference mitigation, anti-jamming, spectral immunity*

Funded by the
European Union

Role in the Proposal: Coordinator / WP leader

Existing partnerships : S/W company with cyber protection capabilities, spectrum immunity solution provider, mission critical wireless communication provider.

Complementary Capabilities Sought:

- *Critical infrastructure operators (communication, energy, transportation, healthcare)*
- *Software and AI for cyber security*
- *Critical sensors with wireless connectivity*
- *Telecommunication researchers in the field of spectral and interferences analysis*

List the Destination/s and topic/s that are of your interest: *Horizon-CL3-2023-INFRA-01-022*

*Supporting **operators of infrastructures**, such as airports, power plants ,transportation, data centres etc, **relying/depending on critical communication** against wireless threats, in order to reinforce the resilience of these critical infrastructures.*

***What it is the problem you seek to address?** How to identify wireless threats to mission critical communication? How to mitigate hostile threats such as Jammers, Intruders , Interferences?*

***Outline your Project Idea:** Enhance critical infrastructure resilience by :*

- Identify in real time any radio threat that disrupts the infrastructure operation.*
- Block or mitigate any such interference intrusion.*
- Enable end-to-end immunity : Both to the network and to the wireless devices.*

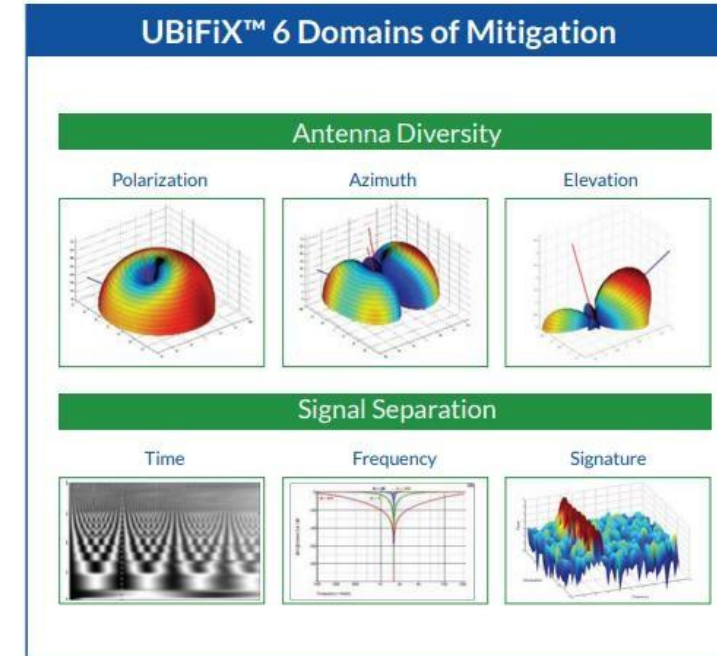

Explain the long-term impact of the solution/idea.

- Achieve resilient reliable mission critical communication.
- Achieve significant reduction of risks and exposures to wireless threats of the dependant infrastructures.
- Improve the reliability and flow of situation awareness data related to critical infrastructures

What is the research/technology/expertise/skills you own to solve the problem.

- Innovative interference mitigation technology, protecting hundreds of tier-1, 4G sites .
- Expertise in 4G/5G technology ,classification, interference mitigation ,DSP.
- *Development and integration of wireless systems , HW and SW*
- A big database of various interferences and spectral anomalies
- *Antenna array processing for direction finding and spectral immunity*

Previous R&I Projects

- REWIND FP7 Project – Technical lead, 2 WP lead
- 4 bi-national and 4 national R&I projects

R&I Team

- Over 150 accumulated years, experience in Communication Algorithms, DSP System, RF, HW and SW design
- 10 awarded patents

Funded by the
European Union

Conclusion and Key Take Away Messages

- *Critical infrastructures depend heavily on resilient critical communication.*
- *Hence there is strong need to identify in real time any threats to this mission critical communication.*
- *And a strong need to mitigate those interferences .*
- *Bear in mind that the cyber world is closely coupled to the mission critical 4G/5G networks*

Keywords

*Resilient critical wireless communication and infrastructure
intrusions detection, interference mitigation, anti-jamming, spectral immunity*

Pitch Presentation

Ms. Sabine Delaitre
The Wick: innovation unit
of BOSONIT-Nworld group

Presentation and Overview of our R&D projects

Type of company: for-profit – SME with the support of LARGE - BOSONIT

Country: Spain with an International Market presence

Contact Details: e-mail sabine.delaitre@bosonit.com

***DocExploit, cybersecurity team:** R&D projects, paper submitted to **SecIndustry 2023** (workshop in ARES conference), and **SecurIT finalist** (with ELLiot Cloud as partner and with SION: secure IoT network as the project to secure critical infrastructure)*

***BOSONIT, Tech & Data – PIC 917525620:** 12 ongoing R&D projects (national and European) in Industry4.0; Agriculture4.0; and data and advanced analytics + own innovative projects (such as Living lab for data management)*

ELLiot Cloud (IoT, Edge, Cloud) – PIC 892670243:** various R&D projects and 2 EU projects; IIoT; smart cities, smart energy, smart water, smart building and the new EU Project – Digital Europe Programme: **DOME A Distributed Open Marketplace for Europe Cloud and Edge Services

What we are looking for

Synergies for building new projects

Our role:

- *Technical provider: cybersecurity, vulnerability detection, development health assessment, data risk management*
- *Pilot deployment and management, Integration of new sensors and heterogeneous data sources*
- *Delivery of demonstrators in public and private sectors*

Beneficiary as partner or third-party

- + *We can participate in the proposal preparation, support consortium building*
- + *Team with large experience in European projects including coordinator role or WPL*

Interest in the following topics (not exclusive)

HORIZON-CL3-2023-INFRA-01-02: Supporting operators against cyber and non-cyber threats to reinforce the resilience of critical infrastructures

HORIZON-CL3-2023-CS-01-01: Secure Computing Continuum (IoT, Edge, Cloud, Dataspaces)

HORIZON-CL3-2023-DRS-01-01: Improving social and societal preparedness for disaster response and health emergencies

HORIZON-CL3-2024-CS-01-01: Approaches and tools for security in software and hardware development and assessment

Our digital transformation offer

DocExploit – cybersecurity focus

- Cybersecurity suite (DocSpot, DocDocker, SirDocker), **vulnerabilities detection in code and container**, Security automation /**DevSecOps**
- **Accurate** solution by using graph structure (reduce false positive), **CVE/CWE, MITRE database**
- Preventive Security system

Graphenus –Data and Advanced Analytics focus

- Transparency, white box
- Data governance
- ML / FL, Big data pipeline, batch and streaming
- Data visualization, Business intelligence
- Real-time forecasting systems

AppoLow – Software Engineering, Low Code focus

- Software development platform
- Front/back end, UI/UX design, business process automation
- Faster development (1 week vs 1 month), modularity, flexibility

ELIoT

- IoT platform, cloud services for smart cities, smart farming, smart mobility, cloud computing continuum
- FIWARE open-source standards
- Pilots and projects in public and private sectors
- Business development team

DeepKeep ML Security

Proposal activity:

HORIZON-CL3-2023-CS-01-03

What it is the problem you seek to address?

Security of robust AI systems

Outline your Project Idea:

Develop an advanced software platform that automates multiple layers of AI security, encompassing risk analysis, prevention measures, and real-time detection with immediate mitigation of adversarial and cyber attacks on AI systems.

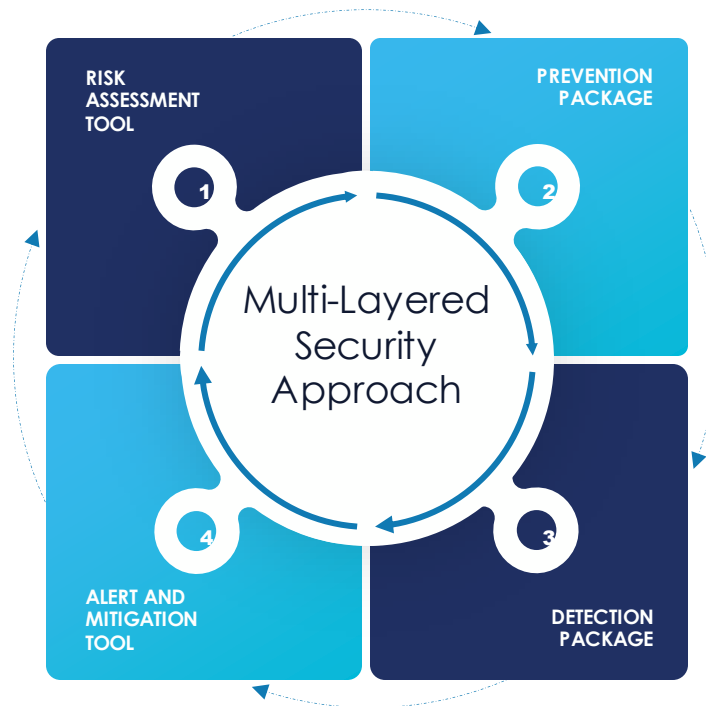

Funded by the
European Union

guy@deepkeep.ai

DeepKeep ML Security

- Penetration testing
- Vulnerability assessment
- Protection recommendation

- Real-time alert triggering
- Dynamic protection
- Operation center and response

- Pre & post-processing
- Robust component injection
- Model reparation

- Stateful/Stateless detection
- Anomaly detection
- Explainability-based detectors

DeepKeep ML Security

Explain the Expertise of your company:

Adversarial AI detection and protection

Cyber attacks on AI

Cyber security

Discuss the Team, any key player that will be working on the project

Use cases: Large Enterprises from the BFSI/Automotive/ Government sectors

R&D: Enterprises and Academic institutions with expertise in:

Adversarial AI (Evasion, Stealing, poisoning, etc.)

Trustworthy AI (weak spots, OOD, XAI, confidence, etc.)

AI ethics and regulation (AI ACT)

ML context awareness

ARISE

**Advanced Risk-Based Secure
Computing Continuum**

Dr. Gencer Erdogan
SINTEF

Type of organisation: Research Institution

Contact Details

Email: gencer.erdogan@sintef.no

Telephone/Mobile: +47 959 04 115

Country: Norway

Keywords: Cybersecurity, Cyber-risk assessment, Privacy, Modelling, Internet of Things, Critical infrastructure, Artificial Intelligence (ML), Dependencies

Role in the Proposal: Coordinator

We are looking for:

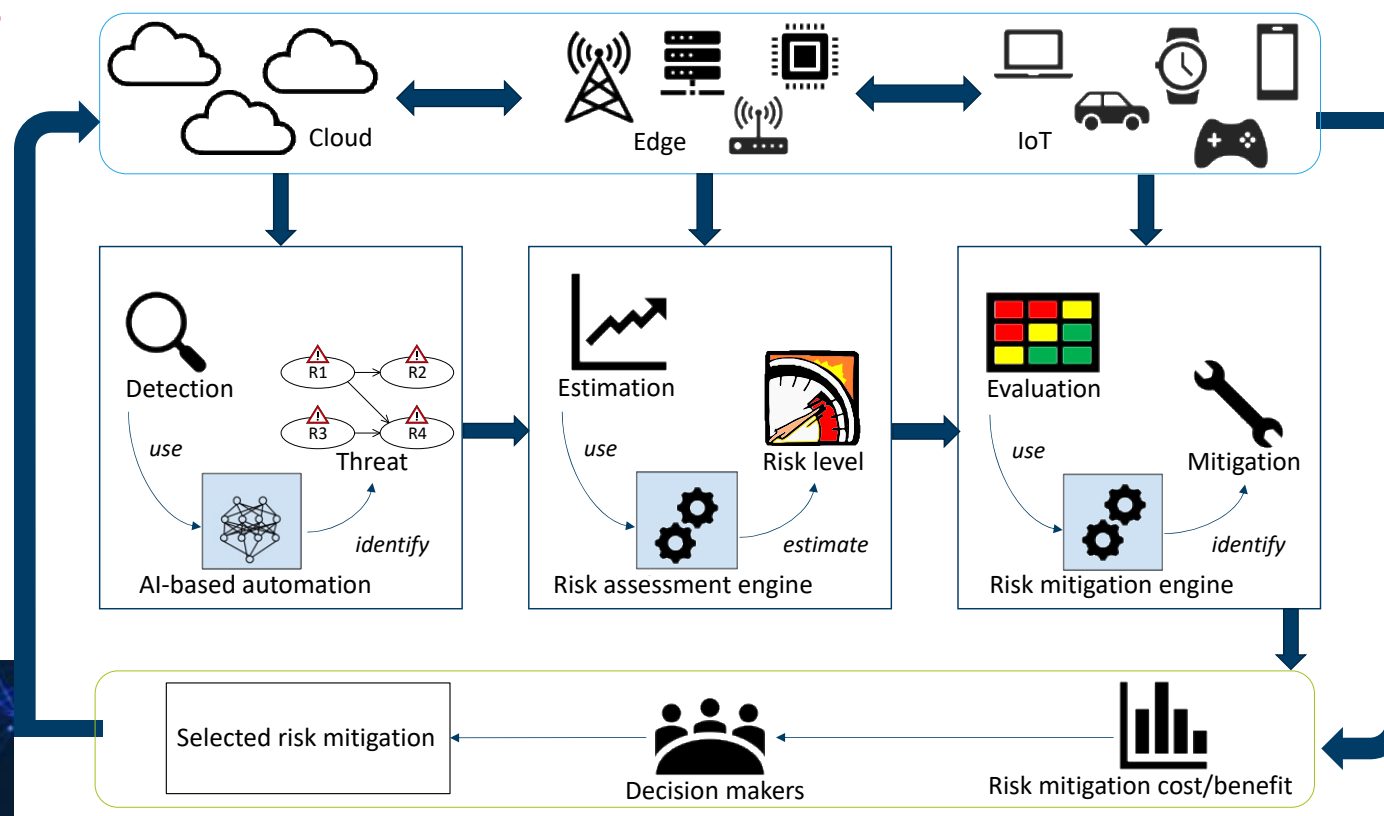

- Smart city operators (e.g., public entities or companies)
- Critical infrastructure operators
- AI experts
- Data centres
- Supply chain companies
- Monitoring and testing expertise

Technology for a better society

- *Increased Cybersecurity - HORIZON-CL3-2024-CS-01-01*
- *How do we detect, assess, and mitigate cybersecurity threats in the Cloud-Edge-IoT continuum, proactively and automatically, considering also dependencies?*

Project Idea:

Long-term impact of the solution/idea.

- *Strengthened EU cybersecurity capacities and European Union sovereignty in digital technologies*
- *More resilient digital infrastructures, systems and processes*
- *Increased software, hardware and supply chain security*
- *Reinforced awareness and a common cyber security management and culture.*

Research/technology/expertise/skills we own to solve the problem.

- *Risk management framework developed over two decades (freely available tools and published books)*

Expertise of our organisation:

- *We do multidisciplinary applied research within technology, resilience, security, social sciences and knowledge management.*

Experience in EU R&I projects:

- *In FP7, SINTEF received more funding for security projects than any other research organization in Europe.*
- *In H2020 SINTEF participated in 440 projects, coordinating 71 of them.*

Technology for a better society

Thank You!!

Funded by the
European Union

Trustworthy AI

Adversarial ML, Privacy, Cryptography

GitHub <https://github.com/ocatak>

***KEYWORDS:** Trustworthy AI, Adversarial ML and Mitigations,
5G/6G Wireless Networks*

Dr. F. Ozgur Catak
Assoc. Professor
University of Stavanger, Norway

University of Stavanger, Norway

- **Expertise:** ***Trustworthy AI** research and applications with focus on Adversarial ML, Homomorphic Encryption, and Federated Learning.*
- **Focus Areas:** *Adversarial ML, Homomorphic Encryption, Federated Learning*
- **Application Domains:**
 - ***5G and 6G:** Beamforming, Spectrum Sensing, Channel Estimation*
 - ***Healthcare:** Secure Data Analysis, Privacy-Preserving Solutions*
- **Goal:** *Ensure reliability, transparency, and ethical use of AI*
- **Ready to discuss further and answer questions !!!**

University of Stavanger, Norway

Role in the Proposal: Partner

We are actively working on development of Trustworthy AI applications

- *Adversarial ML*
- *Homomorphic Encryption based crypto protocol development*
- *Federated Learning based Privacy Preserving AI Development*
- *Uncertainty and model testing in AI*
- *Blockchain based Digital IDs and Smart Contracts*

Our application areas

- *5G/6G applications (Beamforming, IRS, Channel Estimation, Spectrum Sensing)*
- *Healthcare*

Funded by the
European Union

University of Stavanger, Norway

List the Destination/s and topic/s that are of your interest:

- *HORIZON-CL3-2023-CS-01-01: Secure Computing Continuum (IoT, Edge, Cloud, Dataspaces)*
- *HORIZON-CL3-2023-CS-01-02: Privacy-preserving and identity management technologies*
- *HORIZON-CL3-2023-CS-01-03: Security of robust AI systems*

What it is the problem you seek to address?

- *Security-by-design concept and resilience to adversarial attacks;*
- *Improving privacy-preserving technologies for cyber threat intelligence and data sharing solutions;*
- *AI-based automation tools for cyber threat intelligence;*
- *Research and development of self-sovereign identity management technologies and solutions;*
- *Improved scalable and reliable privacy-preserving and identity management technologies for federated and secure sharing and for processing of personal and industrial data and their integration in real-world systems;*

University of Stavanger, Norway

- **Expertise:** *Our company/organization specializes in Trustworthy AI and has extensive experience in the field.*
- **Activities and Expertise Keywords:** *Adversarial ML, Homomorphic Encryption, Federated Learning, 5G, 6G, Healthcare.*
- **EU R&I Projects:** *We have actively participated in several EU-funded Research and Innovation (R&I) projects related to Trustworthy AI.*
- **Key Players:** *Our team consists of highly skilled professionals with expertise in AI, telecommunications, and healthcare.*
- **Collaboration:** *We have collaborated with renowned experts, academic institutions, and industry leaders to drive innovation in Trustworthy AI.*

University of Stavanger, Norway

Thank you

Pitch Presentation

Mr. CARLOS García-Gordillo
PhysUp SRL

Creating digital health experiences

PhysUp is a private SME

Contact Details

Email: cgarcia.management@cemad.es

Mobile: +34 627080476

Country: Spain

ehealth; research&development; quality management systems; business accelerator

Funded by the
European Union

Creating digital health experiences

Role in the Proposal: Coordinator

PhysUp has been involved in several R&D projects at the national and EU level. Its partners have been involved in the healthcare sector for over 40 years.

We are looking for SME's with expertise in ehealth, early warning systems, communications, and in any of the related outcomes of the topic.

Funded by the
European Union

Creating digital health experiences

Our topic of interest is:

HORIZON-CL3-2023-DRS-01-01: Improving social and societal preparedness for disaster, response, and health emergencies.

We are seeking to address, in the event of a new health emergency, the needs of the 29.7 M people, 65 and over, living alone in the EU.

Our project idea is to develop a system involving older people living alone, for the prevention, preparedness, response, and recovery to unexpected systemic health events, relying on the primary healthcare network, and aiming at the preservation and reconstruction of their living environment – One Health.

Funded by the
European Union

Creating digital health experiences

The annual excess mortality for the EU in 2020 was 11.9 % higher than the 2016-2019 average, increasing in 2021 to 14.0 %. The project's aim is to lower those figures in a future health emergency.

Technology alone is not a solution to a problem that involves human behavior. The problem can only be tackled by changing the way society in general and primary healthcare in particular addresses a future health emergency. PhysUp's partners are specialized in helping the healthcare sector in improving the management of their operations.

ehealth; research&development; quality management systems; business accelerator

Creating digital health experiences

PhysUp is an eHealth company looking to bring the latest ideas in digital technology to the world of healthcare and wellness. We believe in working alongside multiple stakeholders, from healthcare professionals to patients.

Our expertise is based on that of our partners. We have been involved for almost 40 years in research and development programmes, at national and international levels, participating in the European R&D programmes since the Seventh Framework Programme. We are also active as business accelerators helping start-ups to smoothly jump into the next stage of their business path.

ehealth; research&development; quality management systems; business accelerator

Creating digital health experiences

Our aim is to coordinate a consortium for the topic HORIZON-CL3-2023-DRS-01-01. We believe that the first four expected outcomes listed in the work programme are essential: Inequality and ways to communicate with vulnerable groups; Improvement of Health literacy; Challenges for communication; and Citizen at the centre of crisis management.

ehealth; research&development; quality management systems; business accelerator

Funded by the
European Union

Country: Spain

Insert any KEYWORDS in relation to your Activities and Expertise:

Connectivity, Intelligence & Security

Funded by the
European Union

***Role in the Proposal: Coordinator** + Technical partner (UGVs communication systems and route planning and monitoring)*

Looking for partners with the following expertise/ technology/ application field:

- *Law enforcement authorities*
- *UGV manufacturers, integrators and/or operators*
- *Sensor manufacturers*
- *AI experts for decision making*
- *Legal & ethical partner*
- *End users experience monitoring and impact*

Funded by the
European Union

List the Destination/s and topic/s that are of your interest:

HORIZON-CL3-2023-DRS-01-05: Robotics: Autonomous or semi-autonomous UGV systems to supplement skills for use in hazardous environments

What it is the problem you seek to address?

Improve the situational awareness and communications of UGVs as well as the information sharing provided by UGVs

Outline your Project Idea:

Improve the situational Integral platform for remote unmanned vehicle operation and teaming with humans.

Explain the long-term impact of the solution/idea.

What is the research/technology/expertise/skills you own to solve the problem.

- *Improved positioning accuracy through the use of GALILEO, sensor fusion and the possibility of integrating high-precision local positioning based on UWB.*
- *Redundant communication system based on datalink (LoS) and cellular communications (3G, 4G & 5G), possibility of integrating satellite communication*
- *Image and video processing via AI onboard hardware or via 5G edge computing*
- *Route planning and replanning in real time ("provides the vehicle with intelligence to make decisions autonomously")*

Insert any KEYWORDS in relation to your Activities and Expertise

UGV, onboard computer, autonomous, unmanned vehicle

Funded by the
European Union

Explain the Expertise of your company/organisation.

ICT technologies focused in three main topics:

- *communications*
- *security*
- *intelligence*

Outline any experience in EU R&I projects or other.

Gradiant has taken part in more than 35 European projects, including communications for unmanned vehicles, payloads integration, data analytics and security measures.

Funded by the
European Union

Conclusion and Key Take Aways Messages, if any...

Unmanned vehicles are a key tool in hazardous environments, increasing the situational awareness of the vehicle and the human operator will imply a more efficient use of these tools opening the door to new use cases.

*Insert any KEYWORDS in relation to your Activities and Expertise
R&D, Unmanned vehicles, UGV, communications*

Thank You!!

DISASTER coordination of the city, local authority, GOVERNMENTAL (CITY) MANAGEMENT

Funded by the
European Union

Denizli Governorship

- Denizli Governorate is the head authority of the general administration of our province Denizli (1 million population).
- It is authorized:
- To ensure the publication, announcement and implementation of laws and other legislation in the province.
- To execute instructions and orders, and to take all necessary measures for the realization of the work.
- **As the highest authority**, it has a very large organization to distribute the entire budget (from the central government).
- It manages and coordinates the execution of all public services such as **security, health**, education, energy, economy, culture **and social services**.

Related Department Establishment in Denizli Governorate; provincial disaster and emergency department, provincial police department, provincial gendarmerie command, provincial health department

- ***As a partner***

Funded by the
European Union

List the Destination/s and topic/s that are of your interest:

HORIZON-CL3-2023-DRS-01-01:

Improving social and societal preparedness for disaster response and health emergencies

HORIZON-CL3-2023-FCT-01-03:

New methods and technologies in service of community policing and transferable best practices

HORIZON-CL3-2023-DRS-01-02:

Design of crisis prevention and preparedness actions in case of digital breakdown (internet, electricity etc.)

HORIZON-CL3-2023-FCT-01-06

Enhancing tools and capabilities to fight advanced forms of cyber threats and cyber-dependent crimes

What it is the problem you seek to address?

- *Especially after disaster security plan for cities are essential.*
- *We need to improve the awareness of the disaster in the social and public areas.*
- *In addition, cyber security in provinces*

- Played a very active role in the search and rescue area of the debris in the earthquake region,
- The coordination for the necessary construction equipment, tool, and equipment support for the removal of the destroyed building parts
- Convoys carrying aid materials were sent to the earthquake area and crews and equipment have been provided
- In provincial governorships with civil airports, ports, and border gates; Necessary traffic and security measures have been taken for the transportation of aid received to our country from abroad via land, air, sea, and railways to aid storage and distribution reception centers.
- The governorship has undertaken important duties in the placement of earthquake victims in public facilities, hotels, and temporary accommodations (such as tents, and containers).
- Collection centers have been established throughout the province for aid collection.
- Offices have been established under the chairmanship of the Deputy Governors for the evaluation of applications from citizens.

Key player that will be working on the project

- provincial police department :1,366.
- provincial gendarmerie command: 1.116.
- provincial disaster and emergency department

Disaster Coordination, City coordination project, Disaster action plan project

Denizli Governorship

- *To improve the knowledge and abilities in disaster, emergency, evacuation response, and evacuation.*
- *To take the necessary precautions against disaster and emerging risks in the living spaces of individuals and to make them safe.*
- *To provide necessary infrastructure such as preventing power outages before and after the earthquake.*
- *To be a participant in demo applications in projects*

Disaster Coordination, City coordination project, Disaster action plan project

Funded by the
European Union

RESALLIANCE by Sixense

RESALLIANCE

Ms. Emilie Edelblutte
RESALLIANCE by Sixense

RESALLIANCE

Resalliance is a consultancy firm dedicated to adapting buildings, infrastructures, regions, and countries to climate change

Contact Details

Email: emilie.edelblutte@resalliance.com

Telephone/Mobile: + 33 6 22 15 55 16

Country: France

Key Words: Resilience, Infrastructure, Cities, Climate Change Adaptation, Nature-Based Solutions, Earth Observation, Digital Tools, Risk Assessment, Climate models and projections

Funded by the
European Union

Role in the Proposal: Partner / leader of WP

Skills and Values:

- Digital decision-support platforms to (i) increase resilience of buildings, infrastructure, people, and natural resources (ii) guide investments options and (iii) assess compliance to UN SDGs and European Green Taxonomy
- Strategy Roadmap on resilience efforts and Enterprise Risk Management
- Actors in co-creating standardization frameworks related to resilience
- AI and Digital twins dedicated to climate change adaptation
- Project coordination
- R&D and Innovation focused firm (Resalliance Lab)

Key Words: Corporate strategy, Risk management, Safety, Taxonomy and ESG compliance, GIS and Remote sensing, ecosystems, natural resources

List of Destinations and topics of interest for RESALLIANCE:

Disaster Resilient Societies – HORIZON-CL3-2023-DRS-01-01 / HORIZON-CL3-2024-DRS-01-03 / HORIZON-CL3-2024-DRS-01-04 / HORIZON-CL3-2024-DRS-01-05

Resilient Infrastructures – HORIZON-CL3-2023-INFRA-01-01 / HORIZON-CL3-2023-INFRA-01-02

What it is the problem you seek to address?

The problems we seek to address **are related to climate change and its impacts** on buildings, infrastructures and societies.

Outline your Project Idea:

Supports decision-making towards adapting to the present and future impacts of climate change at multiple scale and in any given context through the development of digital solutions adaptable to any context at any spatial scale

RESALLIANCE

Long-term impact of the solution/idea:

- Decrease in functional and socioeconomic vulnerability to climate change
- Provide multi-years investment plan for climate resilience
- Better preparedness to climate hazards
- Better adaptation of societies to climate change

What is the research/technology/expertise/skills you own to solve the problem:

- A unique and tried-and-tested methodology to create decision-support platforms: tailor-made digital tools
- Downscaling methods
- BIM/GIS interface
- Crisis and resilience management
- Earth Observation / Google Earth Engine
- Predictive modelling

Funded by the
European Union

RESALLIANCE

Experience in EU projects: Partner and leaders of WPs in 4 current EU projects:

- **AgriDataValue:** Smart Farm and Agro-environmental Big Data Spaces
- **ProBono:** The Integrator-centric approach for realising innovative energy efficient buildings in connected sustainable green neighbourhoods
- **CORE:** Science and human factor for Resilient Society
- **Atlantis:** Improved resilience of critical infrastructures against large scale transnational and systemic risks

Team:

A 25 multidisciplinary team of geographers, engineers, land use planners, climatologists, data and IT scientists, architects, economists – most of them holding PhD

Expertise: applied AI & machine learning, citizen engagement platforms, security, ethics & privacy monitoring platforms, digital twinning and simulation

Role in the Proposal: Technical Partner, WP Leader

Core Capabilities:

- Applied Machine Learning & AI in DRS and FCT*
- Citizen engagement & user participation platforms*
- AI-Driven ethics, privacy and security compliance platforms*
- Integration of cyber- and physical security monitoring*
- Digital twinning and digital twin-based simulation*

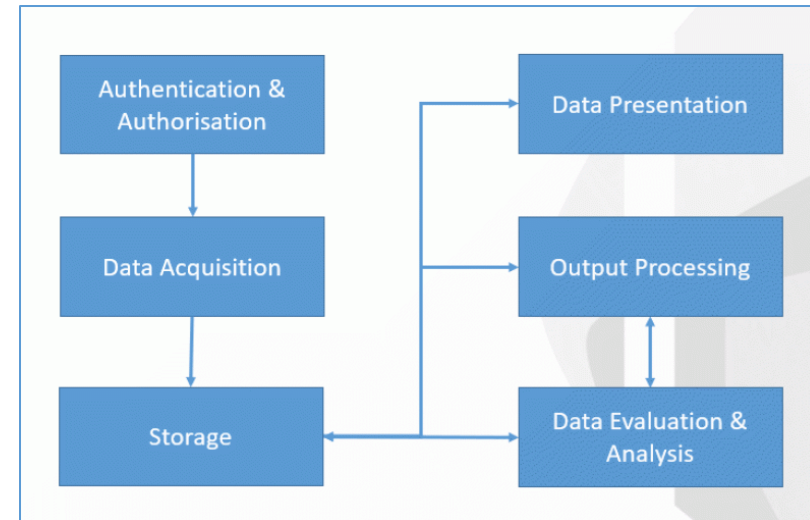

Funded by the
European Union

Innova Integra

- *Development of advanced methods for privacy protection, data anonymisation/pseudonymisation, data access control and data access logging for large and complex data used with big data analytics*
- *Builds on our existing Innova Compliance Monitoring Platform developed in the SPIRIT H2020 research project on FCT data analytics*
- *Ontology models directly translating legal requirements and restrictions into access and monitoring rules*
- *Advanced analytics to identify and prevent data and system misuse*
- *Advanced analytics to identify potential analytics algorithm malfunctions*
- *Tamper-proof logging*

Innova Integra

- *R&D activities building on our Innova Participation Platform already successfully deployed in multiple H2020 projects*
- *Data crowdsourcing, machine learning and language processing analytics and generation of expressive statistics and data visualisations including meaningful geospatial visualisation*
- *Multi-stakeholder planning, coordination and evaluation tools in a single system for real-time and asynchronous collaboration*
- *Development of easy-to-use and universal digital citizen tools for data gathering and to receive guidance during crisis situations*
- *Further research of existing agent-based tools for modelling citizen reactions to crisis situations*

List the Destination/s and topic/s that are of your interest:

Sigoria Security Solutions Ltd.

Sigoria

Type of company/organisation: Private

Contact Details

Email: skawczynski@sigoria.eu

Telephone/Mobile: +48 660 724 261

Country: Poland

KEYWORDS: AI, Machine Learning, IT solutions, CBRN

Funded by the
European Union

Role in the Proposal: Partner

We are experienced in the development of IT solutions to be used by the public sector, including systems concept creation and its requirements. Our scope of interest involves also support systems and procedures for the public bodies. We are able also to find and initiate cooperation with project partners from Poland and Romania (eg. LEA's, Universities, Scientific Institutes, Hospitals).

Funded by the
European Union

Topics of our interest:

HORIZON-CL3-2023-FCT-01-01: Processing of large, complex and unstructured datasets resulting from criminal investigations, while reconciling big data analysis and data protection

HORIZON-CL3-2023-BM-01-01: Capabilities for border surveillance and situational awareness

HORIZON-CL3-2023-DRS-01-03: Operability and standardisation in response to biological toxin incidents

HORIZON-CL3-2023-DRS-01-05: Robotics: Autonomous or semi-autonomous UGV systems to supplement skills for use in hazardous environments

HORIZON-CL3-2023-DRS-01-06: Increased technology solutions, institutional coordination and decision-support systems for first responders of last-kilometer emergency service delivery

HORIZON-CL3-2023-SSRI-01-02: Accelerating uptake through open proposals for advanced SME innovation

Funded by the
European Union

- Create innovative solutions for security sector applying the AI, Machine Learning and neural networks
- Be part of interesting international projects
- Support systems and procedures for the public bodies

We are experienced in the development and implementation of IT solutions to be used by the public sector, including systems concept creation and its requirements.

We are able also to find and initiate cooperation with project partners from Poland and Romania (eg. LEA's, public security services responsible for public safety issues, Scientific Institutes, Hospitals).

Currently we are the member of international consortium in the project:

HOTHREAT - CBRNe protection measures for hotels and conference centres

(Estimated Project Cost: €3,277,228.10, starts 01.07.2023)

Funded by the
European Union
