# HORIZON-WIDERA-2024-ERA-01-01: Programme level collaboration between national R&I policy makers

## Scope:

- Maintain existing and establish new **collaborations**, hence continuing the spirit of the successful ERA-NET scheme, and extending it also to EU missions;
- Align national and regional research funding programmes on agreed priorities that are common to the countries participating in the action
- Pool the necessary resources from the participating national (or regional) research programmes and, where appropriate, leverage other resources to implement calls for proposals, either within the context of this action or in possible follow-up actions;
- Demonstrate potential impact at national, regional and transnational level – no overlaps with actions co-funded by the EU under Horizon 2020 or Horizon Europe;
- Duration appropriate to the ambition and complexity of the proposal.

# HORIZON-WIDERA-2024-ERA-01-01: Programme level collaboration between national R&I policy makers

## Expected outcomes:

- Identification of common research and innovation priorities at the level of national and regional R&I programmes, taking into account international developments, where relevant, leading to the development of coordinated R&I funding agendas;
- Implementation of multiannual joint calls, resulting in the funding of transnational collaborative R&I projects;
- Implementation of other joint activities supporting the market, regulatory or societal uptake of results;
- Contribution to participating states meeting Global Challenges, including relevant contribution to the SDGs.

## Overview:

### **HORIZON-WIDERA-2024-ERA-01-01**

6 December 2023 – 12 March 2024

ERA Policy Agenda action no: 10

Type: CSA

Overall indicative budget: M€ 6

Budget per project: M€ 2

Expected no. of projects: 3

Legal entities established in non-associated third countries may exceptionally participate in this Coordination and support action and are exceptionally eligible for Union funding.

# HORIZON-WIDERA-2024-ERA-01-03: Support for the professionalisation of research management

## SCOPE:

**Aim: Research management to be regarded as multi-dimensional**

**Develop solutions to challenges of research management:**

- Need for practice exchange between early career & experienced research managers
- Need for continuous upskilling, EU-level research management learning and training
- Need to increase recognition of the profession and careers
- Uneven distribution of research management capacity across the ERA

**In particular, develop or consolidate:**

- Support for flexible and diverse research management careers
- Sustainable EU-level training programmes, virtual and/or physical
- A road to certification or accreditation, thereby improve awareness and recognition
- Accessibility to initiatives for staff from entities from lower R&I intensity

**IMPORTANT:** complementarity with ongoing projects **CARDEA & RM ROADMAP**

# HORIZON-WIDERA-2024-ERA-01-03: Support for the professionalisation of research management

## Expected outcomes:

- Involvement of **a large number** of public RPOs and RFOs and their research management staff in training and networking programmes for research managers
- Improved **accessibility** to such programmes for research management staff from regions of lower R&I intensity;
- Improved training, skills and career development of research management staff in the participating organisations;
- Further **professionalisation**, such as through certification of training programmes;
- Increased **awareness** and recognition of the research management profession in Member States, and the important role of research managers across the ERA.

## Overview:

### **HORIZON-WIDERA-2024-ERA-01-03**

6 December 2023 – 12 March 2024

Type: CSA

Overall indicative budget: M€ 1

Budget per project: M€ 1

Duration of projects: 2-5 years

Expected no. of projects: 1

# HORIZON-WIDERA-2024-ERA-01-04: Strengthening researchers' skills for better careers – leveraging the European Competence Framework for Researchers

## **SCOPE:**

### **Important policy background:**

- Update of the European Skills, Competences and Occupations (ESCO) classification, including skills and occupations relevant for researchers
- European Competence Framework for Researchers (ResearchComp), including competences for a successful and interoperable career in academia and beyond

### **Projects are expected to contribute to:**

- The uptake of ResearchComp by public and private research performing organisations
- Strategic interaction with innovation ecosystem actors, for better understanding of labour market skills needs, to close the gap between demand and supply
- Exchange of best practices between HEIs and other training providers
- More effective science communication, incl. to attract young talents to R&I jobs
- Certification and recognition of targeted training opportunities (micro-credentials)

### **Activities may include:**

- Roadmap development, networking, sector-specific training development, seed funding for training developers in academic sector or beyond, development and implementation of a ResearchComp-based self-assessment tool for researchers

# HORIZON-WIDERA-2024-ERA-01-04: Strengthening researchers' skills for better careers – leveraging the European Competence Framework for Researchers

# HORIZON-WIDERA-2024-ERA-01-04: Strengthening researchers' skills for better careers – leveraging the European Competence Framework for Researchers

## Expected outcomes:

- Researchers at all career stages equipped with transversal skills based on ResearchComp, to foster more open and inter-sectoral research careers, and a better recognition of the researcher profession;
- Exchange of best practices between HEIs, research institutions, and other training providers for the improvement of research and transversal skills training;
- Better meeting of labour market demands with jointly developed training programmes;
- Contribution to certification of micro-credentials;
- Improved communication of science to the public.

## Overview:

### **HORIZON-WIDERA-2024-ERA-01-04**

6 December 2023 –12 March 2024

ERA Policy Agenda action nr.: 4

Type: CSA

Overall indicative budget: M€ 0,5

Budget per project: M€ 0,5

Expected no. of projects: 1

Expected duration: 2-5 years

# HORIZON-WIDERA-2024-ERA-01-07:

## Capacity building on intellectual property (IP) management to support open science

### SCOPE:

- Improving the understanding of the relationship **between open science and IP** – In particular how an adequate management of IP lies at the core of open science
- Greater **awareness** of researchers' IP rights and how they can be exercised to allow them to comply with funder open access mandates
- Supporting **education and training** in IP management that enables open science
- Capacity building in research organisations and their staff with the objective to support and equip researchers at all stages of their career with the knowledge they need in this area
- Projects are expected to consider the existing IP service delivery landscape and the training materials offered by EC service contracts.

# HORIZON-WIDERA-2024-ERA-01-07: Capacity building on intellectual property (IP) management to support open science

## Expected outcomes:

- Analysis of how adequate IP management enables and boosts open science and how IP management and open science are complementary in achieving a better dissemination and valorisation of knowledge
- Providing specific training materials, modules or courses on IP assets and open science, and delivering high-quality training to the trainers and support to them in acting as multipliers
- Gathering experiences and sharing good practices for the further development of courses on the topic
- Awareness-raising campaign on how an adequate IP management enables and fosters open science.

## Overview:

### **HORIZON-WIDERA-2024-ERA-01-07**

6 December 2023 –12 March 2024

Type: CSA

Overall indicative budget: M€ 2

Budget per project: M€ 2

Expected no. of projects: 1

ERA Policy Agenda action no: 2

Expected duration: Max. 24 months

Other conditions: Early and open sharing – under open licenses – of the outputs resulting from
