Project Partner Search Form - HORIZON-HLTH-2025-01-DISEASE-06

☒ I offer my expertise to participate as a Partner in a Horizon Europe Project

☒ I am planning to coordinate a project and I am looking for Project Partners

TOPICS OF INTEREST

HORIZON-HLTH-2025-01-DISEASE-06: Scaling Agentic AI to Support Complex Non-Communicable Disease Multimorbidity Management in Rural Communities

We aim to transform complex long term medical case management using an Agentic AI system designed to **augment multidisciplinary teams** managing complex NCD cases. It will function as an intelligent assistant – capable of performing administrative tasks, suggesting tailored interventions, coordinating services, and monitoring adherence across social and health care domains. It seamlessly connects with local healthcare data infrastructures, and is developed combining patient, family and multi-disciplinary clinician's needs.

Description of the (Research) Team

HappySeniors is a multidisciplinary SME with deep expertise in healthcare, social services, and artificial intelligence. Our work bridges technology and human-centred care, creating effective tools for aging populations and underserved communities. We combine deep domain expertise in human services with advanced technical knowledge in AI, creating a powerful foundation for developing innovative solutions for the human services market. We understand both the complex ongoing needs of patients and their families, as well as the professionals serving them.

Expertise of the Team Leader

Avidor Rabinovitch is an Electrical Engineer from the Technion with an MBA from the University of Haifa. He has successfully led product innovation and accelerated growth for multiple companies. He has worked with various startups and in senior positions, including founder and CTO in ventures like NovoDia and Tensor Labs, where he led the development of AI-based products and large language models (LLMs), focusing on technological and product strategy.
