

Horizon Europe Experience & Collaboration

MAIN INFORMATION

Experience with Horizon Europe

VTMT has participated in Horizon Europe projects, contributing forensic science expertise and modern laboratory capabilities to support innovation in evidence analysis and criminal investigations.

SPECIFIC INFORMATION

AI in Forensics: VTMT helped develop AI-supported tools that improved the speed and accuracy of forensic workflows.

Cross-Border Data Sharing: VTMT contributed to building interoperable forensic data systems across EU countries, enhancing international case collaboration.

OTHER IMPORTANT INFORMATION

Partnerships and Collaborations

VTMT is an active member of ENFSI and works with leading EU forensic institutes, universities, and the European Commission's Joint Research Centre on projects related to forensic science, technology, and public safety.
