

PROJECT PARTNER SEARCH FORM

SALVUS - CLINIC OF CLINICAL PSYCHOLOGY

- I offer my expertise to participate as a Partner in a Horizon Europe Project
- I am planning to coordinate a project and I am looking for Project Partners

TOPICS OF INTEREST

Clinical psychology, mental health care delivery, prevention and early intervention, diagnostics and assessment (including neurodevelopmental conditions such as ADHD), rehabilitation and behavioral interventions, mental health in traffic safety, psychological fitness and risk assessment, workplace mental health, integration of digital tools into clinical practice, quality standards in mental health services.

We would like to participate in:

- Supporting the implementation of the Cancer Mission
 - o Earlier and more precise palliative care (HORIZON-MISS-2026-02-CANCER-04)
 - o Boosting mental health of young cancer survivors through the European Cancer Patient Digital Centre (ECPDC) (HORIZON-MISS-2026-02-CANCER-05)

PARTNER INFORMATION

Salvus is a healthcare provider specialized in clinical psychology and real-world implementation of mental health and behavioural interventions.

We are interested in joining a Horizon Europe consortium as a clinical and implementation partner, contributing access to clinical populations and enabling testing, validation and deployment of interventions in routine practice.

Our core strength lies in bridging research and practice – ensuring that interventions are not only theoretically sound, but also applicable, usable and effective in real-world healthcare settings.

We contribute through:

- access to real-world clinical populations
- implementation and pilot testing of interventions
- validation of behavioural and mental health outcomes
- integration of new approaches into routine clinical practice

We focus on measurable outcomes, including engagement, adherence, and real-world effectiveness of interventions. This includes evaluation of intervention effectiveness in real-world clinical conditions and translation into routine care.

We are particularly interested in projects focused on prevention, behaviour change, digital mental health, and improving accessibility and effectiveness of care.

<https://eraportal.sk/horizont-europa/>

We closely collaborate with a digital partner (ksebe), enabling the combination of clinical expertise with digital delivery, user engagement and scalability of interventions.

Description of the institution, organizational structure, legal form

Salvus is a healthcare facility providing services in clinical psychology, including diagnostics, therapy, and specialized psychological assessments (e.g., for drivers, risk assessment, and other regulated areas). The organization operates within the healthcare regulatory framework and ensures compliance with professional and ethical standards.

The structure includes clinical psychologists, therapists, administrative support, and management responsible for service quality, operations, and development of new services. Salvus also collaborates with external professionals and partners to expand its service scope.

Legal form: healthcare provider / private medical facility.

Description of specialization, experience with national/international projects, specific equipment or skills

Salvus specializes in clinical psychology, behavioural assessment, and real-world implementation of mental health interventions.

The organization focuses on applying evidence-based approaches in practice and evaluating their impact under real-life conditions. This includes structured clinical assessments, behavioural observation, and interpretation of outcomes in complex real-world environments.

A key strength of Salvus is the ability to serve as a bridge between research and practice – providing a setting where interventions can be tested, validated and adapted for routine use.

Key capabilities include:

- access to diverse clinical populations
- real-world testing and validation of interventions
- behavioural and cognitive assessment
- outcome evaluation in applied settings
- integration of innovations into standard clinical workflows

Description of the (Research) Team

The Salvus team consists of experienced clinical psychologists and therapists working directly with diverse client populations.

<https://eraportal.sk/horizont-europa/>

The team has strong expertise in applying psychological methods in practice and evaluating their effectiveness in real-world conditions. This allows Salvus to contribute not only to clinical aspects of projects, but also to implementation, validation, and interpretation of intervention outcomes.

Expertise of the Team Leader

The team leader is a clinical psychologist and therapist with extensive experience in clinical practice, diagnostics, and development of psychological services. He combines expertise in healthcare delivery, organizational development, and innovation in mental health services.

His background includes leadership of a clinical facility, development of new service models, and active involvement in professional communities. He is able to bridge clinical rigor with practical implementation and strategic thinking in project environments.

Potential role in the project

Research (applied / clinical data collection)

Training (clinical perspective, practice transfer)

Dissemination

Other: ***clinical implementation partner, pilot site, validation of interventions and outcome evaluation in real-world settings,***
