

Project Partner Search Form

- I offer my expertise to participate as a Partner in a Horizon Europe Project
 I am planning to coordinate a project and I am looking for Project Partners

TOPICS OF INTEREST

[TailorPath](#) is interested in joining Horizon Europe consortia in the fields of digital health, AI-supported care, ageing, oncology, mental health, rehabilitation, disability, hospital-to-community transition, caregiver support, and personalised care planning.

Specific interest includes the following topics:

HORIZON-MISS-2026-02-CANCER-05

Boosting mental health of young cancer survivors through the European Cancer Patient Digital Centre

HORIZON-MISS-2026-02-CANCER-07

Improving the Quality of Life of older cancer patients

HORIZON-MISS-2026-02-CANCER-04

Earlier and more precise palliative care

TailorPath is particularly interested in building or joining a consortium focused on AI-supported personalised care, patient journey management, quality of life, mental health, rehabilitation, self-management, family caregiver support, and continuity of care during and after cancer treatment.

PARTNER INFORMATION

Description of the Legal Entity

- Higher Education
 Research Institution
 Public Administration
 Industry / SME
 NGO
 Other: Please specify

TailorPath is an Israeli digital health SME developing an AI-driven platform for personalised care planning, functional assessment, patient and caregiver support, and professional care coordination.

Description of the Research Team

TailorPath brings together expertise in digital health, AI-supported personalised care, public health, care pathway design, functional assessment, accessibility, health and social care integration, and real-world implementation.

The team develops and implements digital tools that support patients, families, caregivers, and professional teams across complex care journeys. The platform supports structured assessment, personalised goal setting, intervention planning, follow-up, reminders, accessible communication, outcome monitoring, and dashboards for professional and organisational use.

TailorPath has experience working with healthcare organisations, welfare services, disability services, older adults, people with complex needs, and multidisciplinary care teams. The company is involved in Israeli and European initiatives focused on ageing, rehabilitation, disability, mental health, and integrated care.

TailorPath works in close collaboration with **Assuta Ashdod University Hospital**, a leading Israeli public university hospital, particularly through its Innovation Division. This collaboration supports real-world clinical implementation, digital health innovation, hybrid models of care, and evaluation of new patient-centred solutions.

Expertise of the Team Leader

Daniela Blecher, Founder and CEO of TailorPath, has extensive experience in public health, service development, personalised intervention planning, implementation of care models, disability and ageing services, and cross-sector coordination between health, welfare, education, and community-based care.

Her expertise includes development of person-centred methodologies, implementation of digital solutions in complex care settings, stakeholder engagement, service design, accessibility, and measurable outcome-based care planning.

Daniela leads TailorPath's strategic development, partnerships, implementation activities, and participation in national and European innovation initiatives.

Potential role in the project

- Research
- Training
- Dissemination

Other: Digital health technology provider, AI-supported personalised care platform, implementation partner, real-world pilot support, patient and caregiver engagement tools, data collection and outcome monitoring.

TailorPath can contribute to the project through:

Development and adaptation of an AI-supported digital platform for older cancer patients, caregivers, and professional teams.

Support for personalised care planning based on functional, emotional, social, and quality-of-life needs.

Digital tools for patient engagement, reminders, self-reporting, caregiver support, and follow-up.

Professional dashboards for multidisciplinary teams.

Accessible user experience adapted to older adults and people with functional or cognitive limitations.

Support for PROM/PREM collection, Goal Attainment Scaling, quality-of-life monitoring, caregiver burden assessment, and real-world outcome tracking.

Implementation support in collaboration with clinical partners, including Assuta Ashdod University Hospital.

Contribution to dissemination, training, stakeholder engagement, and exploitation activities.
