Description of your expertise:

Axeleros Preclinical Development drives translational strategy from pre-clinical research to First-in-Human (FIH) clinical trials across pharmaceuticals and vaccines by executing GLP-compliant chemical, pharmacology, and toxicology testing using traditional *in vitro* and *in vivo* models while supporting AI-powered, human-relevant NAMs (New Approach Methodologies) that evaluate safety, toxicity, and efficacy without relying on animal testing—directly advancing the 3Rs framework.

Combining robust safety assessment, regulatory affairs, and project management, Axeleros Preclinical Development is your preclinical development expert partner helping to bring innovative healthcare solutions to clinical trials and the market across Europe
