

“LEARN MORE ABOUT EIT CAMPUS” WEBINAR

23 September 2026, 10:00-11:30 CEST (VIA TEAMS)

Within the framework of the EIT national contact points project (NCP4EIT), **a series of webinars focused on the applicants from the targeted geographical regions with low participation are being organised.** The main aim of this activity is to raise awareness among research organisations of the various EIT KICs opportunities across all areas of the knowledge triangle and increase the number of successful applicants.

The event will place the EIT Campus within the broader strategic context of the EIT and its KICs, while providing a practical, hands-on introduction to the platform and its learning offer. **The webinar will explore how EIT Campus can become a useful resource for NCPs and especially for national stakeholders (like universities, companies, public authorities, innovation ecosystems and others) in enhancing their education systems, skills development and lifelong learning.** The session will also briefly look at the future development of EIT Campus.

AGENDA

- | | |
|-------|---|
| 10:00 | Welcome and introduction to the EIT, Anna Vosečková, TC Praha, Czechia |
| 10:10 | NCP4EIT project, coordinating team, FORTH/PRAXI, Greece |
