

FROM VACANT SPACES TO VIBRANT PLACES

Partner with Dubolimbург

HORIZON-NEB-2026-01-BUSINESS-03

Approaches to reuse vacant, obsolete or underutilised spaces

We are looking to join a European consortium and invite project coordinators to include Dubolimbург as a research, innovation and Living Lab partner.

WHY DUBOLIMBURG?

Research & innovation driven

We develop and test innovative solutions for real-life challenges.

Strong link with local authorities

We work closely with cities and municipalities across Limburg.

Built-environment expertise

Spatial, technical, financial and organisational knowledge.

From research to implementation

We translate results into practical tools, policy advice and action.

**Let's create places that matter.
Together.**

Why Dubolimbург strengthens the consortium

A regional R&I partner that connects European research with local authorities, real-life cases and implementation.

R&I

Research & innovation

Developing, testing and validating approaches for sustainable living environments.

LOCAL

Local authority network

Direct connection to cities and municipalities and their spatial, climate and community challenges.

BUILT

Built-environment expertise

Spatial, technical, financial and organisational perspectives in one partner.

CO

Co-creation

Bringing together public authorities, citizens, businesses, knowledge partners and professionals.

ACT

Implementation capacity

Turning research outputs into usable tools, policy pathways and real-world action.

EU

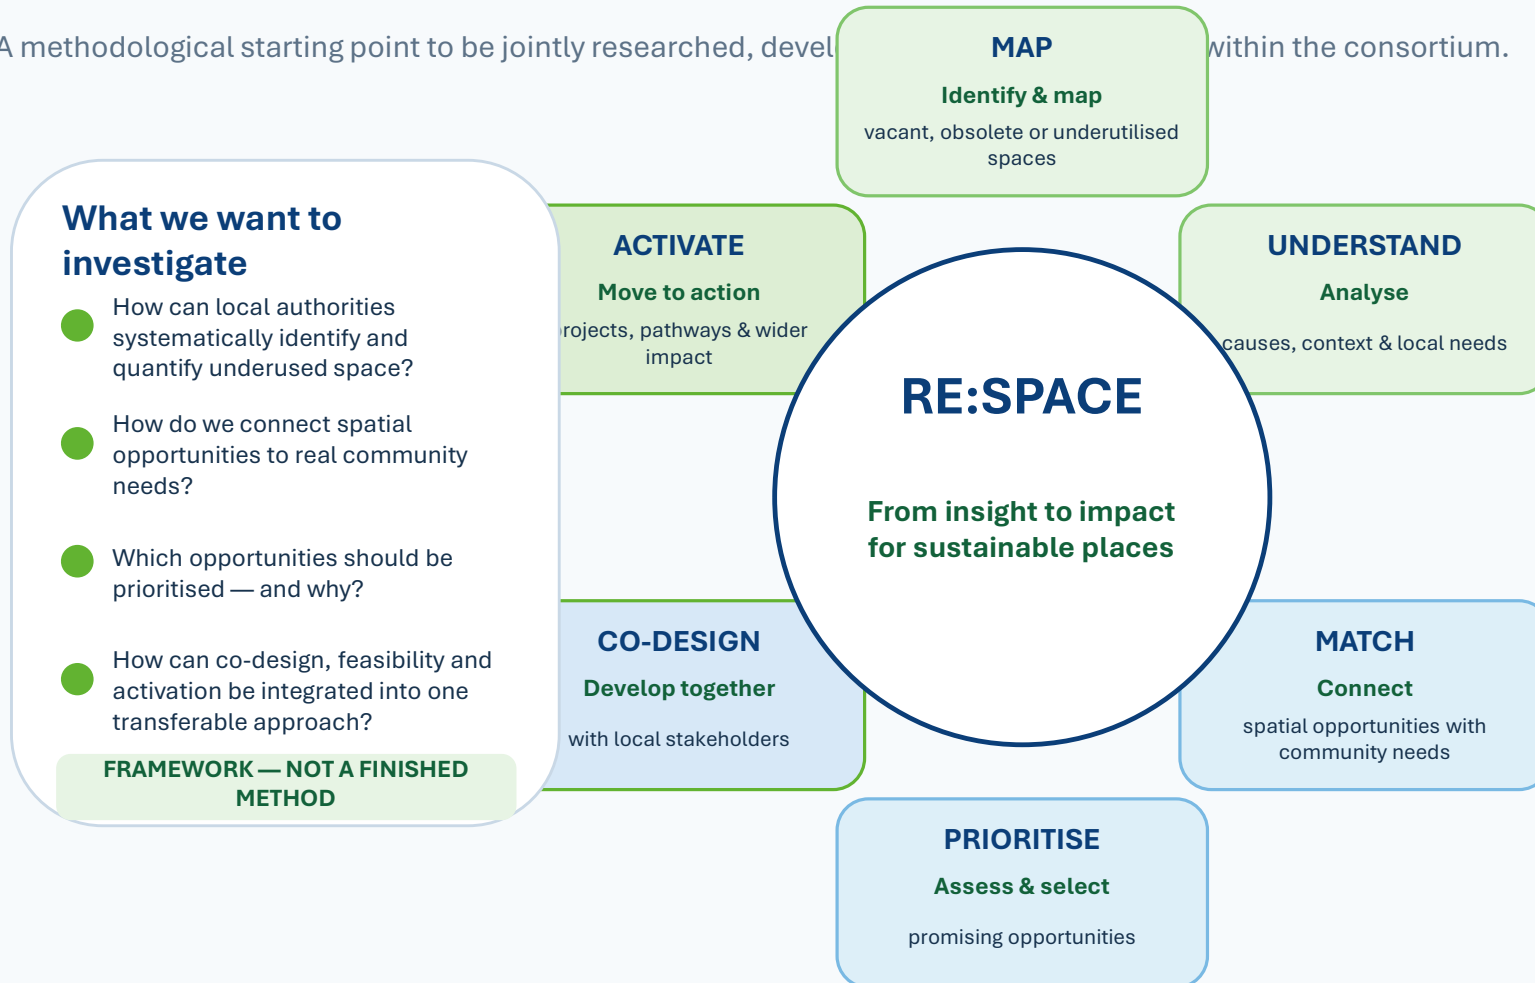

European connections

Linking Limburg practice to Flemish and European networks for replication and upscaling.

Our role: bridge research ↔ local needs ↔ experimentation ↔ implementation

RE:SPACE: from spatial potential to real-life activation

A methodological starting point to be jointly researched, developed and tested within the consortium.

What we bring to your consortium

Dubolimbург is open to different roles and consortium set-ups. We want to contribute where local experimentation and implementation add value.

LIMBURG AS A LIVING LAB

Urban • peri-urban • rural

- Real-life cases and local challenges
- Cities & municipalities as key actors
- Vacant housing and public buildings
- Underused economic sites and other spaces
- Testing, validation and replication

POSSIBLE ROLES

R&I partner

Living Lab partner

Methodology
development

Stakeholder
engagement

Case identification

Replication &
exploitation

We bring real-life cases, local partners and implementation experience — and we are committed to a strong, impactful and high-quality proposal.

GET IN TOUCH

Interested in involving Dubolimbург in your proposal? We would be happy to discuss opportunities.
