🌍 Green and Inclusive Future International Brokerage Event | 21 January 2027 · Istanbul

Ideas need other ideas. And the right partners.

On 21 January 2027, TÜBİTAK will bring together organisations from Türkiye and across Europe in Istanbul for the Green and Inclusive Future International Brokerage Event, organised within the Technical Assistance for Türkiye in Horizon Europe Project and in conjunction with the Enterprise Europe Network.

For more than two decades and across four successive EU Framework Programmes, TÜBİTAK has worked to connect Türkiye's research and innovation community with Europe and make its scientific, technological and industrial capabilities visible to European consortia.

The event takes this work forward at an important moment. Organisations are beginning to shape their partnerships, project ideas and proposals for the 2027 Horizon Europe calls. It will focus on four areas at the heart of Europe's green, digital and inclusive transition:

- Culture, Creativity and Inclusive Society | Cluster 2

Democracy, cultural heritage, creative industries and social transformation.

- New European Bauhaus | NEB

Sustainability, inclusion and quality of experience in transforming buildings, neighbourhoods and public spaces.

- Digital Calls, Chips JU & Smart Networks and Services JU | Cluster 4

Semiconductors, strategic digital technologies, future connectivity and 6G, with opportunities to connect Türkiye's capabilities with emerging European value chains.

- EU Missions | Climate-Neutral & Smart Cities + Cancer

Climate-neutral cities and research and innovation to improve the lives of people affected by cancer.

This project is co-financed by the European Union
and the Republic of Türkiye

💡 From calls to project ideas, and from project ideas to partnerships.

The day begins with a plenary session bringing together leading voices and perspectives on the wider European research and innovation landscape, setting the scene for the exchanges ahead.

The programme then moves into four parallel sessions combining upcoming call presentations with project pitching, where participants can share their ideas, present what they are working on and connect with the partners they are looking for.

🤝 In the afternoon, those ideas move to the table through face-to-face B2B matchmaking meetings, arranged in advance through B2Match to explore potential partnerships and future collaboration.

And the conversation continues beyond Istanbul: the B2Match platform will remain open for online meetings until the end of 2027, as project ideas, partnerships and proposals develop.

🎯 Who should join?
Universities and research organisations, SMEs and large companies, technology developers and start-ups, public institutions and agencies, sectoral associations and clusters from Türkiye and all countries eligible to participate in Horizon Europe.
